

MINI SURVIVAL KIT

There is no guarantee that you will be home when disaster strikes. What do you need if you must stay at work for several days or rely on your car for short-term shelter? What do you need if you are forced to make your way home on foot? Storing your supplies in a small backpack will make them convenient and easy to carry in any of these circumstances.

PRO TIP:

Never let your gas tank fall below one-quarter full. In an emergency, gasoline oftentimes becomes a scarce resource.
